26 March 1982MEMORANDUM FOR: 

SA/DCI/IA

STAT

VIA: Chief, Legislative Liaison Division *X*

FROM: Legislative Liaison

SUBJECT: Additional Details Regarding Admiral Inman's 29 March  
Appearance Before the Science Research and Technology  
and Investigations and Oversight Subcommittees of the  
House Committee on Science and Technology

1. As you are aware, the hearing is scheduled to begin at 9:00 a.m. and will be divided into three sections. Admiral Inman will participate in the first and will be joined by Lawrence Brady, Assistant Secretary of International Trade Administration (Department of Commerce) and Dr. George Millburn, Acting Deputy Under Secretary for Research and Development (Department of Defense). The second panel will consist of Dr. Frank Press, President of the National Academy of Science, and Dr. Robert Rosenzweig, Vice-President for Public Affairs, Stanford University; Dr. Robert Corell, Director of Marine Programs, University of New Hampshire; Dr. Edward Gerjuoy, Professor of Physics, University of Pittsburgh, and Dr. John McLucas, President of the World Systems Division of COMSAT, will testify during the third segment.

2. I have been informed that Admiral Inman may be asked to comment on whether the thousands of students from bloc countries studying in our universities present a problem vis-a-vis unwanted technology losses. If the response is affirmative, what is the perceived magnitude of this problem? David Hartman, Executive Secretary, Technology Transfer Intelligence Committee, could draft some succinct talking points on this subject. Please advise if Admiral Inman wishes me to pursue this.
